INSTALLATION QUESTIONS

Will I need council approval?

Most councils require that any retaining walls over 1.0m in height from natural ground level are subject to building approval. Furthermore, any retaining wall that is less than 1.5 metres away from a building or other retaining wall also requires building approval.

Can you provide a Form 15 & 16?

Yes we can, we have an engineer on staff ready to give you help and advice. Please contact us for pricing.

Do your products meet Australian Standards?

Yes, all of our products meet Australian Standard for Earth Retaining Structures (AS 4678-2002).

Can I cut concrete sleepers?

Concrete sleepers can be cut using a diamond blade, under running water. Be sure to seal up the exposed steel with a gal paint or tar paint, to prevent rusting. Please note that cutting your ACP concrete sleeper will void your 35 year warranty.

Can someone install the retaining wall for me?

We can provide contact numbers of trade people who can provide you with a quote.

Do you deliver?

Yes we have the ability to deliver anywhere in Greater Sydney, Newcastle, Wollongong, Central Coast and Blue Mountains.

For more information or help with retaining walls, call Aussie Concrete Products on 96791218 or visit LandscapeSupplies.com.au
